About Me

Seasoned software professional with deep expertise in Java, Go, and Rails. 6 years of experience delivering mission-critical systems.

Education

M.Tech. in Artificial Intelligence

2018

Imperial College London

API Design Competition

Projects

Schema Validator (2023)

Designed and implemented Payment Processing System with Go, integrating with LlamaIndex for seamless data flow

Tech: LlamaIndex, Rails, Go

Skills

Java Go Rails Express.js LlamaIndex MongoDB Neon SQLite ArgoCD RabbitMQ Jenkins
Kafka Terraform Fly.io Azure GCP Railway Heroku Anthropic Google Gemini Replicate
OpenAI API Claude API GraphQL Scrum LLM Integration

Internships / Experience

LLM Engineer at Uber (2024-02 – Present)

Architected and built RESTful APIs serving 500+ requests/day using Actix, reducing response time by 51%
Architected and built RESTful APIs serving 1000+ requests/day using Rails, reducing response time by 65%
Architected and built RESTful APIs serving 10000+ requests/day using Replicate, reducing response time by 62%

Built event-driven architecture using LangChain, processing 5000+ events daily

Software Engineer at Figma (2020-11 – 2023-12)

Designed and implemented microservices architecture using TDD, handling 1000+ concurrent users
Designed and implemented message queue system using PHP, processing 100+ messages/hour
Built automated CI/CD pipelines with PHP, reducing deployment time by 45%
Built automated CI/CD pipelines with PHP, reducing deployment time by 27%

Backend Developer at Anthropic (2020-03 – 2020-10)

Developed real-time data processing pipeline using Docker, handling 100000+ transactions/second
Reduced infrastructure costs by 63% through optimization using Docker
