

Phillip Roberts

Backend Engineering · 15.8 years · Port Shannonville, Netherlands

phillip.roberts@gmail.com · +1-681-412-1031 · <https://linkedin.com/in/phillip-roberts> · <https://github.com/philliproberts>

Professional Profile

Distinguished technologist with 16 years shaping backend engineering practice. Deep expertise in Rust, Node.js, Go and proven ability to influence C-level decisions.

Core Competencies

Rust · Node.js · Go · Django · Actix · Gin · LlamaIndex · ASP.NET · DynamoDB · CockroachDB · Cassandra · Supabase · MySQL · Jenkins · Kubernetes · Kafka · Render · GCP · Claude API · OpenAI API · Replicate · AWS Bedrock · LLM Integration · GraphQL · Scrum · CI/CD · Agile

Professional Experience

API Developer at Shopify (2024-03 – Present)

Architected and built RESTful APIs serving 10000+ requests/day using Helm, reducing response time by 19%
Developed real-time data processing pipeline using DynamoDB, handling 500+ queries/second

Platform Engineer at Twilio (2019-06 – 2023-10)

Created authentication and authorization system using Express.js, securing 5000+ user accounts
Architected and built RESTful APIs serving 5000+ requests/day using CI/CD, reducing response time by 66%
Built automated CI/CD pipelines with CI/CD, reducing deployment time by 40%

Software Engineer at TechFlow AI (2014-12 – 2019-06)

Developed real-time data processing pipeline using Microservices, handling 5000+ transactions/second
Implemented caching layer with Rust, reducing database load by 39%
Optimized database queries using Supabase, improving query performance by 29%
Mentored team of 8 junior developers on OpenAI API best practices

Software Engineer at PipelineIO (2013-12 – 2014-06)

Developed real-time data processing pipeline using Fly.io, handling 10000+ documents/second
Architected and built RESTful APIs serving 100+ requests/day using Anthropic, reducing response time by 48%
Built event-driven architecture using Anthropic, processing 50000+ events daily
Developed real-time data processing pipeline using Actix, handling 10000+ queries/second

LLM Engineer at Amazon (2009-01 – 2013-07)

Mentored team of 2 junior developers on OpenAI API best practices
Architected and built RESTful APIs serving 100+ requests/day using GraphQL, reducing response time by 66%

Education

M.Eng. in Computer Science — University of Toronto (2008)
