SUMMARY

Senior backend engineering engineer with 7 years of experience architecting and delivering enterprise solutions. Expert in Ruby, Go, Gin with demonstrated leadership in cross-functional teams.

WORK EXPERIENCE

AI Engineer

2022-05 — Present

CodeReview.io (full-time)

Developed real-time data processing pipeline using Azure, handling 5000+ queries/second
Built event-driven architecture using Azure, processing 50000+ events daily
Built automated CI/CD pipelines with Azure, reducing deployment time by 63%
Led migration from monolithic to microservices using Cloudflare, improving system scalability by 50%

API Developer

2020-07 — 2021-11

VectorDB Inc (full-time)

Implemented caching layer with C#, reducing database load by 34%
Created authentication and authorization system using Fly.io, securing 5000+ user accounts
Led migration from monolithic to microservices using C#, improving system scalability by 21%
Created authentication and authorization system using C#, securing 100+ user accounts

Platform Engineer

2018-09 — 2020-02

TechFlow AI (freelance)

Created authentication and authorization system using Azure, securing 100000+ user accounts
Optimized database queries using Azure, improving query performance by 59%
Designed and implemented microservices architecture using Azure, handling 100000+ concurrent users

EDUCATION

B.Sc. in Computer Science

2018

McGill University

M.Eng. in Electrical Engineering

2017

University of Edinburgh

SKILLS

Ruby, Go, Gin, LlamaIndex, FastAPI, Cassandra, Neon, SQLite, PostgreSQL, Supabase, ArgoCD, Jenkins, RabbitMQ, Helm, DigitalOcean, Vercel, OpenAI API, AWS Bedrock, Google Gemini, Anthropic, TDD, CI/CD, GraphQL

CERTIFICATIONS

Certified Kubernetes Administrator — CNCF (2021)

ADDITIONAL

Hobby: Arduino/IoT projects

Personal_statement: Passionate about open source and building technology that makes a difference.
