

Mary Murillo

DevOps / SRE / MLOps — Johnsonport, India

mary.murillo@murillo.dev · 001-646-624-5618x517 · <https://linkedin.com/in/mary-murillo> · <https://github.com/marymurillo>

Profile

Experienced software engineer with expertise in YAML, HCL, and Pulumi. Proven ability to lead technical initiatives and mentor junior team members.

Experience

MLOps Engineer	at Stripe	2025-07 – Present
Designed and implemented infrastructure as code using TorchServe, managing 50000+ servers		
Designed and implemented infrastructure as code using TensorFlow Serving, managing 100+ servers		
Created self-service provisioning portal using TorchServe, serving 5000+ engineers		
Cloud Engineer	at CloudNova	2024-12 – 2025-06
Built disaster recovery solution using CloudFormation, achieving RTO of 54ms		
Established GitOps workflows using CloudFormation, improving deployment frequency by 66%		
SRE	at HashiCorp	2023-04 – 2024-08
Implemented container orchestration using Helm, managing 100000+ containers		
Optimized cloud infrastructure using SRE Practices, reducing costs by 40%		
Built CI/CD pipelines using Helm, reducing deployment time from 15s to 152ms		
Established chaos engineering practices using Prometheus, improving system resilience		
MLOps Engineer	at NeuroLink Labs	2021-11 – 2023-04
Built automated backup solution using Kale, ensuring 500% data protection		
Implemented container orchestration using Helm, managing 100+ containers		
Built CI/CD pipelines using CircleCI, reducing deployment time from 28s to 71ms		

Education

M.Sc., Information Technology	2020
University of Melbourne	
M.Sc., Cybersecurity	2022
EPFL	

Technical Skills

YAML, HCL, Pulumi, ArgoCD, Crossplane, Helm, Terraform, Podman, K3s, Buildah, GitLab CI, CircleCI, GitHub Actions, Jenkins, Azure DevOps, ELK Stack, Datadog, Prometheus, VictoriaMetrics, Opsgenie, Oracle Cloud, Linode, MLflow, TorchServe, Infrastructure as Code, Platform Engineering, Zero Trust

Projects

DataPipe CLI — Built Auto-scaling Solution using HCL and YAML, enabling automated processing and improving efficiency by 40%

Schema Validator — Created Observability Dashboard leveraging HCL for core functionality and HCL for optimization
