

Matthew Lloyd

Mid Backend Engineering | 4.9+ Years Experience

matthew.lloyd@protonmail.com | 001-460-919-1344x3899 | East Susanmouth, Singapore

<https://linkedin.com/in/matthew-lloyd>

Executive Summary

Mid-level backend engineering specialist with 5 years building production systems. Skilled in Go, Kotlin, Ruby with focus on performance optimization and code quality.

Leadership Experience

Platform Engineer

2025-08 – Present

Airbnb

Developed real-time data processing pipeline using Redis, handling 10000+ records/second

Mentored team of 6 junior developers on Redis best practices

Built event-driven architecture using TDD, processing 5000+ events daily

Optimized database queries using TDD, improving query performance by 49%

API Developer

2022-07 – 2025-04

TechFlow AI

Created authentication and authorization system using MongoDB, securing 5000+ user accounts

Implemented caching layer with PHP, reducing database load by 65%

Optimized database queries using PHP, improving query performance by 64%

Software Engineer

2020-11 – 2022-06

Netflix

Mentored team of 4 junior developers on Neon best practices

Implemented caching layer with Hugging Face, reducing database load by 19%

Education

B.A. in Cybersecurity — McGill University, 2019

B.Eng. in Data Science — UIUC, 2021

Key Skills

Go | Kotlin | Ruby | TypeScript | NestJS | LangChain | Flask | CockroachDB | Supabase | Git | ArgoCD | Helm | Nginx | GitHub Actions | Fly.io | Azure | Render | Railway | GCP | Replicate | Google Gemini | TDD | GraphQL
