Professional Profile

Mid-level backend engineering specialist with 5 years building production systems. Skilled in Go, C#, Python with focus on performance optimization and code quality.

Core Competencies

Go · C# · Python · Java · Node.js · FastAPI · LlamaIndex · MySQL · Supabase · SQLite · Elasticsearch · Jenkins · Kubernetes · Git · Azure · Render · DigitalOcean · Google Gemini · Azure OpenAI · Replicate · Claude API · RAG Architecture · Microservices · CI/CD · GraphQL

Professional Experience

Software Engineer at Notion (2024-02 – Present)

- Developed real-time data processing pipeline using PostgreSQL, handling 5000+ documents/second
- Reduced infrastructure costs by 32% through optimization using DigitalOcean
- Designed and implemented microservices architecture using Fly.io, handling 100000+ concurrent users

Platform Engineer at Notion (2021-02 – 2023-10)

- Mentored team of 5 junior developers on LLM Integration best practices
- Designed and implemented microservices architecture using FastAPI, handling 10000+ concurrent users
- Mentored team of 5 junior developers on LLM Integration best practices
- Created authentication and authorization system using FastAPI, securing 100000+ user accounts

Education

B.Sc. in Information Technology — University of Waterloo (2022)

B.A. in Information Technology — Georgia Tech (2019)
