SUMMARY

Technical leader in cybersecurity with extensive experience designing microservices, optimizing performance, and building high-performing teams. Proficiency in Rust, C, OWASP ZAP.

WORK EXPERIENCE

Penetration Tester

2023-07 — Present

Datadog (contract)

Built secure CI/CD pipeline using Sigma, preventing 5000+ security issues
Implemented encryption solution using React, protecting 50000+ records
Implemented security monitoring using SOC2 Compliance, detecting 100+ threats
Developed threat intelligence platform using Splunk, tracking 1000+ threats

AppSec Engineer

2019-07 — 2023-01

Vercel (full-time)

Designed zero-trust architecture using Snort, securing 10000+ endpoints
Designed zero-trust architecture using OWASP Top 10, securing 10000+ endpoints
Implemented encryption solution using Figma, protecting 100000+ records
Implemented SIEM solution using OWASP Top 10, processing 50000+ logs/day

EDUCATION

B.Tech. in Electrical Engineering

2020

Carnegie Mellon University

B.Sc. in Information Technology

2016

KAIST — GPA: 2.93

SKILLS

Rust, C, OWASP ZAP, Suricata, Nessus, SonarQube, Elasticsearch, Redis, MongoDB, PostgreSQL, AWS Security Hub, GCP Security Command Center, Azure Sentinel, OWASP Top 10, SOC2 Compliance, Zero Trust Architecture, Threat Modeling, SAST/DAST

PROJECTS

Deployment Dashboard *(Rust, OWASP ZAP, C)*

Designed and implemented SIEM Integration with OWASP ZAP, integrating with C for seamless data flow

Real-time Analytics Engine *(C, Rust, OWASP ZAP)*

Designed Vulnerability Scanner leveraging OWASP ZAP microservices architecture with Rust for caching

ADDITIONAL

Publication: "End nature stock analysis make study cause" — ACM 2021

Hobby: Learning new languages
